FR	Chère cliente, Cher client, Merci pour votre commande ! Peu importe que vous ayez acheté un meuble fabriqué en bois naturel, un haut brillant ou une face en plastique mat – chaque meuble a ses propriétés spécifiques. Même les propriétés et la structure du bois, comme par exemple les petits nœuds sur des meubles en bois naturel, font partie de l'aspect de chaque meuble en bois naturel et sont soumis aux variations permanentes du climat et de l'humidité. Il se peut que quelques modifications surviennent sur la surface, comme par exemple de fines fissures ou des décolorations. En règle générale, au cours du temps, la clarté du bois diminue et son intensité de coloration augmente – le bois devient foncé. Les modifications saisonnières sont un processus normal des matières naturelles comme le bois. Ce petit livret vous donne quelques astuces sur l'entretien de votre meuble pour que vous puissiez en profiter longtemps.

IT	Gentili clienti, sentiti ringraziamenti per il vostro ordine! A prescindere che abbiate scelto un mobile realizzato in legno naturale, un fronte lucido o un fronte di materiale plastico opaco – ogni esemplare ha sue particolarità. Anche le caratteristiche e la struttura del legno, quali ad esempio rami minori nei mobili di legno naturale, sono parte del fascino individuale di ogni singolo mobile. Dato che i mobili in legno naturale sono esposti al continuo variare del clima e dell'umidità, è probabile che in superficie insorgano mutamenti quali crepe capillari o cambiamenti di colore. Generalmente con passar del tempo diminuisce la chiarezza e aumenta la saturazione del colore – il legno si scurisce. I cicli mutamenti sono un normale processo dei materiali naturali, quali appunto il legno. Il presente libretto intende darvi alcuni suggerimenti sulla cura del vostro mobile, affinché vi procuri lunghe soddisfazioni.
-----------	--

IT	Sostanzialmente vale: • Non poggiare oggetti roventi sui mobili. • Non poggiare candele a diretto contatto del mobili. • Asciugare subito i liquidi sversati. • Ad intervalli periodici controllare se viti e cerniere sono salde. • Il caratteristico odore fragrante è sempre una prova di qualità dei mobili in legno naturale. • Le macchie chiare sui rami si formano per via della naturale fuoriuscita di resina, e sono levigabili con un panno asciutto che non lascia peli. • Anche trattandosi di altri materiali lignei, di vernice, pelle o imbottiti, all'inizio è inevitabile un leggero odore caratteristico. Dopo qualche tempo però, questi odori svaniscono da sé. • Potete aiutare a farli volatilizzare in minor tempo cambiando più spesso aria all'interno di casa. • Un panno umido d'acqua con qualche goccia d'aceto. • Conservare bene le presenti istruzioni.
-----------	--

IT	Istruzioni sulla cura dei mobili in materiali pannellati Per la cura dei mobili in materiali pannellati si consiglia di usare un panno morbido, che non lascia peli, o un panno di pelle. Passare il panno leggermente umido sulle superfici. Sostanzialmente vale: I seguenti detergenti e prodotti per la pulizia: • panni in microfibra o spugne a tampone. Questi prodotti contengono spesso fini particelle abrasive, che possono provocare sgraffiature sui mobili; • forti sostanze chimiche nonché detergenti o solventi abrasivi. Anche questi prodotti possono aggredire le superfici; • polvere abrasiva, paglietta d'acciaio o spugne abrasive. Rovinerebbero la superficie in modo tale che non sarebbe più possibile ripararle; • aspirapolvere. Bocchette e spazzole possono sgraffiare le superfici; • pulitrice a vapore. Per via dell'elevata pressione e calore con cui il vapore colpisce le superfici, esse rischiano di deteriorarsi o addirittura staccarsi dalla sottostruttura.

GB	Dear customer, Thank you for your order! No matter if you bought a piece of furniture made from natural wood, a high-gloss front or a plastic front – every piece of furniture has unique characteristics. Even the texture and structure of wood, such as small knots in natural wood furniture, are part of the individual charisma of each piece of furniture. Since natural wood furniture are permanently exposed to climate and humidity fluctuations, changes to the surface may occur (e.g. hair cracks or changes in colour) in some cases. In general, brightness decreases and colour saturation increases in the course of time – the wood darkens. The changes mentioned above are normal for natural raw materials such as wood. This booklet provides some care tips for your piece of furniture so that you can enjoy it for a long time.
-----------	---

GB	The following applies in general: • Don't place any hot objects on the furniture. • Don't place candles directly on the furniture. • Immediately wipe off any spilled liquids. • Regularly check if the screws and fittings are tight. • The typical, aromatic wooden odour is always a proof of quality for natural wood furniture. • The natural emission of resin may produce bright spots on the knots which can be polished with a dry, lintfree cloth. • Initially, a slight intrinsic odour is unavoidable for other woods, paint, leather or upholstery materials too. These odours automatically disappear after a while. If you want to speed up this process, ventilate more often at the beginning and/or wipe out the furniture with a slightly damp cloth which was soaked in water mixed with a small amount of vinegar. • Keep these notes in a safe place.
-----------	--

GB	Care notes for furniture made of panel materials We recommend using a soft, lint-free cloth or a shammy for conditioning your piece of furniture made of panel materials. Wipe off the surfaces with a slightly damp cloth or shammy. The following applies in general: Please don't use the following detergents or cleaning agents at all: • microfibre cloths or dirt erasers. They often contain fine abrasive particles which can cause scratches on the surfaces; • aggressive chemical substances as well as abrasive cleaning agents or solvents. They may damage the surfaces too; • souring powder, steel wool or scouring pads. They destroy the surface so badly that reconditioning is impossible; • vacuum cleaners. The nozzles and brushes can cause scratches on the surfaces; • steam cleaners. The surfaces may be damaged or separated from the ground due to the high pressure and heat of the water vapour.
